

The Freedom® 95 family of furnaces: Everything you need for a warm, cozy and perfectly welcoming home, no matter what the weather.

Ultimate

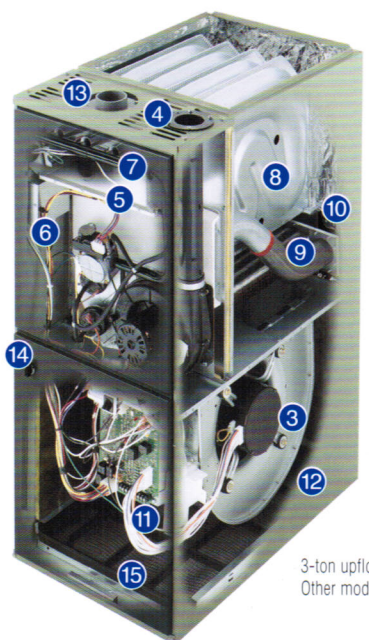

Freedom® 95
Comfort-R™
Variable-Speed,
Three-Stage
Communicating

3-ton upflow model shown.
Other models may vary.

Premium

Freedom® 95
Comfort-R™
Variable-Speed,
Two-Stage

3-ton upflow model shown.
Other models may vary.

- 1 **AccuLink™ communicating capability with user interface (Ultimate models)**
Enables system to “communicate” its status and settings to the Comfort Control, while also allowing remote monitoring and programming by phone.* Clearly relays diagnostics to your installer or servicer for responsive maintenance.
- 2 **Three-wire connection (Ultimate models)**
Simplified connection to the Comfort Control enables faster, easier installation that is less invasive to your home.
- 3 **Variable-speed blower motor with Comfort-R™**
Operates at a lower, more efficient speed than conventional blower motors. With American Standard’s exclusive Comfort-R feature, there is greater humidity control during cooling.
- 4 **Induced draft venting**
Variable-speed draft blower assembly quietly draws hot gases through the heat exchanger to maximize heating.
- 5 **Adaptive hot surface silicon nitride igniter**
Starts burner electronically for safe, efficient operation – eliminating the need for a fuel-burning pilot light.
- 6 **Three-stage modulating gas valve (Ultimate models)**
Highly reliable, proven design that operates at 40%, 65% and 100% firing rates to provide for greater efficiency and better comfort control.

Two-stage gas valve (Premium models)

Results in greater efficiency by providing just the right amount of fuel for each stage.

- 7 **Multi-port in-shot burners**
Perfectly shape the flame cone to maximize heating while using less fuel.
- 8 **Aluminized steel primary heat exchanger**
Crimped, not welded, to prevent cracks from heat stress. Stamped serpentine channel offers the greatest efficiency in less space. Backed by our lifetime limited warranty.
- 9 **Three-row secondary heat exchanger (Ultimate models)**
Made of AL29-4C stainless steel to capture more of the heat you pay for.

Stainless steel secondary heat exchanger (Premium models)

Captures more of the heat you pay for. Also backed by our lifetime limited warranty.

- 10 **Heavy steel insulated cabinet**
Holds more heat in the furnace to better warm your home. Also ensures greater durability and quieter operation.
- 11 **Self-diagnostic controls**
Manage every function with digital accuracy. Includes safety features and a built-in troubleshooting system.
- 12 **Sound-insulated blower compartment**
Ensures the quietest possible operation.
- 13 **100% fresh air option**
Uses 100% outdoor air for combustion to increase equipment life.
- 14 **Dual door latches (Upflow models only)**
Allow easy access to the filter for cleaning or changing.
- 15 **Cleanable filter**
Means you can rinse or vacuum it without buying replacements each time.

* An American Standard 900 Series Comfort Control is required for all Freedom 95 communicating furnaces. Telephone Access Module (TAM) required for remote system monitoring.
